DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group II, Claims 7 and 14, in the reply filed on May 25, 2007 is acknowledged. The traversal is on the ground(s) that there is the ligand system is the special technical feature among the restricted Groups. This is not found persuasive. As stated in the Office action mailed April 24, 2007, the ligand compound is chemically bonded to the transition metal in the transition metal complex of Formula (I), thus, the neutral ligand compound is chemically different from the ligand in the transition metal complex and there is no special technical feature shared among the restricted Groups. While the various metal complex species are represented by a common Formula (I), the various bridge groups represented by "Y" in Formula (I) do not share a common structure, "Y" is defined by six different subgenus, i.e., the transition metal complex species is in fact represented by six subgenus and those subgenus do not share a common structure. Therefore, the six transition metal species are not chemically equivalents and obvious variations among themselves and not so liked as to form a single general inventive concept under PCT Rule 13.1.

The requirement is still deemed proper and is therefore made FINAL.

The search results indicated the elected species is novel, the search is now extended to all species.

Specification

2. Applicant is reminded of the proper length of an abstract. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within

the range of 50 to 150 words. The abstract of the instant application contains more than 150 words. Appropriate correction is requested.

Claim Objections

3. Claim 14 is objected to because of the following informalities: Claim 14 is depended on the restricted Claim 11, applicant is urged to insert the content of Claim 11 to Claim 14.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 7 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claim 7, line 3, of page 6, the term "or" should be replaced with -- and --. The format of the selective members for groups "R²" and "R^{2'}" are improper because Markush terminology requires the phrase "selected from the group consisting of" and the connector "and" between the last two members. See MPEP 2173.05 (h).

The same rejection is also applied to Claim 11 to which Claim 14 is depended upon.

Allowable Subject Matter

6. Claim 7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 1713

7. Claim 14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim.

The search results indicate that there is no prior art teaches or reasonably suggest the instant transition metal complex.
